SUBJECT: BLUE LANTERN POST SHIPMENT END USE CHECK ON LICENSE
050061984

REF: SECSTATE 006052

¶1. Air Vice Marshal Sunaryo of the Indonesian Air Force (IAF) office of Material Maintenance and Supply Command told us on February 4, 2008 that IAF received the air data amplifier for its C130 aircraft detailed in reftel and confirmed that the spare parts are used for the purpose stated on the license. According to Sunaryo, Singapore Technologies Aerospace (ST Aerospace) is IAF's main source for U.S. Austin Aerotech products. ST Aerospace provides maintenance service and acts as a parts purchaser for the Indonesian Department of Defense. Sunaryo also noted that ST Aerospace was aware of the restrictions on USML.

¶2. We contacted the IAF office of Aeronautics Service on February 12, 2008 to verify items related to a different license, but with the same end-user and same foreign consignees received by post via separate email. The items are 4 P/N: 622-4394-013 Air Data Control, 4 P/N: 622-4393-002 Air Data Control, and 4 P/N: 777-1406-056 Yaw Damper Computer. The Aeronautics Service staff told us that IAF did not receive nor place an order to procure these items for ST Aerospace. The staff also added that the license numbers 4 P/N: 622-4394-013 and 4 P/N: 622-4393-002 refer to C-130 aircraft radar equipment, not air data control. On February 12, 2008, we spoke with Ferdy W of Ferco-Genesa, the Indonesian local agent for ST Aerospace. He said that the company had no information about this order.
